Gentlemen:

Enclosed please find five (5) copies each of the revised sections of the Final Phase I RFI/RI Work Plan for Operable Unit No. 5 (OU5) for review. If additional copies are needed, DOE will provide them upon approval of the revisions.

Also after an extensive review of the area to the south of Operable Unit No. 5, it was determined that ongoing programs including OUs 1-3 Work Plans, Routine Sitewide Surface Water Monitoring and Background Characterization will provide sufficient coverage of the area to determine whether contaminants exist at significant levels. If further investigations are warranted, additional sampling may be required under the OU5 Work Plan. This is stated in the revisions. After discussion with the EPA and CDH, it was decided that no addendum would be written to address the area unless a problem was indicated by these ongoing programs. The addendum was to have been submitted by January 17, 1992.

If you have any questions or comments, please contact Jen Pepe of my staff at 966-2184.

Sincerely,

Thomas E. Furlow
for
David P. Simonson
Assistant Manager
for Environmental Management
